

BIO STREAM

Since the release of “Living On Video” in 2016 and track after track STREAM knows how to vary the pleasures while preserving the DNA of the covers it selects. The idea of revisiting and bringing up to date electro / dance titles little known by the younger generations such as "Ultra Flava", "Greece 2000", "Clocks", "Bette Davis Eyes"... adds value to the project. In order to keep going on, STREAM opts for "I Feel Love" originally performed by CRW. You will not escape this effective melody and this faithful and respectful rework of the original version that will kill your headphones and which had never been covered until now.
